 **velocity™**

Recently redesigned and reinforced, the Velocity's coupled toe springs work together to provide a progressive, dynamic response. The smooth roll-over makes for a comfortable walking foot that kicks into gear during high impact activities. The foot combines high functionality for thrill seekers, and no maintenance to keep them on the go.

INTEGRATED SPRING TECHNOLOGY

INTELLIWEAVE® COMPOSITE

College Park's proprietary Intelliweave composite technology brings the maximum amount of strength and flexibility. The fibers are woven by hand in a 3D pattern for ultimate durability and precision gait matching.

WEDGES FOR CUSTOMIZATION

The Velocity ships with three different heel wedges and a toe wedge, providing easy adjustment capabilities to fine-tune the response.

Made with aircraft grade aluminum, the Velocity's housing was reinforced for strength and noise abatement.

The posterior spring was upgraded for improved dynamics. The foot comes custom gait-matched with 10 different spring combinations.

4.5°

4.5°

MULTI-AXIAL RESPONSE

Far superior to the average 2D carbon laminate foot, the Velocity has multi-axial response throughout. The Intelliweave composites provide excellent inversion and eversion for any sort of terrain.

"The Velocity gives me the no-maintenance freedom I needed yet has the energy return and balance I desire. It's perfectly tuned for me; smooth, minimal, balanced power and energy storage plus excellent all over shock absorption. It's a great cycling and every day foot for me."

– Matt, Velocity user
